AI Insights

Automated governance observations

Strong Governance 100%
100% of rules are approved. Approval workflow is operating efficiently.

Cutoff Concentration
Multiple rules use the 500 threshold — a single UW spec change could affect approval rates across all channels.

Version Control Active
Flyway-style semantic versioning is enforced. Zero version collisions detected in this session.

Unpromoted Approvals
29 approved rules have not been promoted to PROD yet.
