Config Change Workflow

1. **Edit Config**
   Lead Analyst updates rule / cutoff
2. **Submit Review**
   Enters reviewer queue with diff
3. **Approve**
   Manager reviews field-level diff
4. **Promote to Prod**
   Config deployed live

Embedded Engine Pipeline

1. **Build Rules**
   Visual builder or JSON editor
2. **SpEL Translate**
   Description → auto-translated expression
3. **Save & Compile**
   Validation → batchId → JVM cache
4. **Execute**
   Provider-filtered fact evaluation
